

***Moonee Valley, home of the Cox Plate and one of Melbourne's premier sporting and function venues upgrades to Inzenius Rostering, Timekeeping and Payroll.***

The venue had been using a rostering process that required substantial time and effort to build schedules for each event and notify staff of their required attendance. MVRC did not capture actual employee attendance times for comparison to rosters, requiring substantial manual time data entry for payroll processing. Now all of these functions have been automated seamlessly improving the accuracy of event costing whilst reducing the time and cost of rostering through to payroll production.

***Inzenius' technology and software products streamlined the process of staff management. It allows for the range of rostering processes including rosters being automatically built based on the event attendance and times, web based employee roster notification and acceptance, time & attendance validation, automated electronic time sheet production based on validation of times worked back to the planned roster through to payroll production in one application.***

Employee times are captured at muster points remotely and then downloaded at the end of each event for comparison to rosters.

Inzenius is a suite of software products that are particularly suited for event based businesses providing a seamless single code based, enterprise level application that can easily scale for larger organisations with multi-site operation.

**Inzenius Software Product Suite:**

- Human Resources Manager
- Auto and manual roster development
- Web roster notification portal
- Award Interpreter
- Time & Attendance
- Payroll
- Reporting Services

Inzenius is used at the leading venues and events across Australia including, ANZ Stadium & All Phones Arena NSW, Patterson Stadium & Racing and Wagering WA, and Peter Rowland catering at Flemington Racecourse as well as the Formula 1 and Motor GPs VIC.
