

Langham Hotel brings its payroll and HR in-house to improve staff satisfaction, award compliance, efficiency and costs.

The management of the Langham Hotel needed to achieve improved staff scheduling, award compliance, management practices and costs consistent with the requirements of a high quality, efficient hotel complex.

The management was not satisfied with their hosted payroll service. It was not efficient in its data capturing and authorizing processes of employee worked times and did not dynamically compare actual times worked to plan. Reporting was driven from the pay-run only and did not easily provide the desired information in a timely manner.

“Inzenius’ technology and software products streamlined the process of staff management. It allows for simplified roster development, time validation, through to automated payroll. It makes it simple to find replacement staff and allows you to quickly identify who is working where and at what times, which is key in the hospitality industry,” Wahid Banihali, Director of Finance, Langham Hotel.

Now the hotel departments are saving time in the development, as well as improving the quality, of their rosters across the Langham Hotel’s entire business.

“I firmly believe in Inzenius’ products and their people provide a level of service unparalleled in the industry,” Wahid said.

Inzenius is a suite of software products that provide a seamless single code based enterprise level application that can easily scale for larger organizations with multi-site operation.
